

## **WORKSHOPS 2026 CARE PLAN ESSENTIALS**

**The Tools, Products  
and Protocols to  
Elevate Your  
Practice**

Join Josée for an in-depth session designed to help foot care nurses take their treatment results to the next level. In this workshop, we'll go beyond the basics to explore **treatment protocols**, product selection, and the essential tools that make every care plan more effective and compliant.

You'll learn how to:

- ✓ Choose the right instruments for each treatment type
- ✓ Integrate products that support healing, comfort, and prevention
- ✓ Streamline your process for better efficiency and consistency
- ✓ Build client compliance through education and proper product pairing

Josée will share the real-world systems and tools she uses in her own clinics to achieve lasting results—and show you how to adapt them to your own practice. Whether you're refining your toolkit or building from the ground up, this session will give you the clarity and confidence to provide the **best care possible** while maintaining professional integrity and business sustainability.
