

WORKSHOPS 2026 ASSESSMENT SKILLS FOR FOOT CARE NURSES

**“Mastering Efficient and
Thorough Foot
Evaluations”**

Workshop Description:

Develop the essential clinical skills needed to perform confident, efficient, and comprehensive foot assessments. This workshop will guide foot care nurses through the process of conducting detailed lower limb and foot evaluations that support accurate findings, treatment planning, and patient education.

Through practical demonstrations, real-world case studies, and expert-led instruction, you'll learn how to:

- *Conduct systematic foot and lower limb assessments efficiently
- *Identify common foot pathologies and risk factors
- *Recognize early signs of complications in high-risk populations (eg., diabetic, vascular, or neuropathic clients)
- *Apply evidence-based techniques for documenting and communicating assessment findings effectively

By the end of this workshop, you will have the confidence and competence to deliver safe, high quality, and patient-centered foot care grounded in professional standards
